

Security Analyst

US Citizen

Motivated cybersecurity student specializing in computer forensics, cryptography, and system security. Completed the Cybersecurity & Privacy Certificate at UGA with hands-on experience in network analysis, penetration testing, and digital forensics. Skilled in identifying vulnerabilities, analyzing threats, and applying security tools to solve real-world problems. Passionate about strengthening systems against modern cyber threats and pursuing a career in cybersecurity.

EDUCATION**B.S. Computer Science, University of Georgia**

2022 - 2025

- 3.51 Current GPA
- Minor: Cognitive Science
- UGA Certificates: Cybersecurity & Privacy, Data Science
- Graduation: December 2025
- Relevant Coursework: Operating Systems, Computer Networks, Cryptology, Cybersecurity, Computer Forensics, Data Security & Privacy

SKILLS**Languages:** Java, Python, C, SQL (MySQL), Assembly Language, HTML, Unix, JavaScript**Security Tools:** Wireshark, Autopsy, Docker, Chronicle, SleuthKit, Volatility**Security Areas:** Cryptography, Forensics, Network Tracing**CERTIFICATES****Google Cybersecurity Certificate, Coursera, 2024****TEEZ's Using the Comm CS Maturity Model to Develop a CS Program, 2024****CompTIA Security+, November 2025****LEADERSHIP ROLES & CLUBS****Treasurer***Technology Student Association (2019 - 2022)*

Held a leadership position for 2 years and participated in engineering design application competitions.

Member*Society for Cyber Security (2022 - 2025)***Member***The Hack Pack (2025)***Member***DevDogs (2024 - 2025)***COMPETITIONS****UGAHacks X**

Feb 2025

- Built a security-aware web app with authentication and database management.

CTF Participation

- Practiced crypto challenges (MD5 hash cracking, password recovery, network traffic analysis).

EXPERIENCE**Software Developer, BeyondFech.com**

2022 - 2023

BeyondFech, a startup, automates real estate appraisal research process.

- Developed Java based application using Selenium and TestNG frameworks. This software automates the research process done by appraisers on various websites with the help of Selenium WebDriver.
- Wrote and optimized complex SQL queries.
- Created data extraction templates by implementing Tesseract OCR.

Mastercard Cybersecurity virtual experience program on Forge

January 2025

- Completed a job simulation where I served as an analyst on Mastercard's Security Awareness Team
- Helped identify and report security threats such as phishing
- Analyzed and identified which areas of the business needed more robust security training and implemented training courses and procedures for those teams

PROJECTS**Traceroute Network Parser (Python)**

- Implemented a parser to analyze raw network traces collected via tcpdump
- Extracted router IP addresses and calculated round-trip times (RTTs) from ICMP responses.
- Demonstrated how packet inspection can reveal network topology and latency across hops.

USB Forensics Report (Autopsy / SleuthKit)

- Performed a forensic analysis of USB device artifacts using Autopsy / SleuthKit in a controlled lab environment
- Recovered metadata such as connection timestamps, device IDs, and file transfer logs
- Reconstructed a timeline of user activity and documented findings in a professional report

ChopChop Attack Implementation (Python)

- Studied WEP vulnerabilities, CRC32 polynomial proofs, and plaintext recovery methods to implement the attack in python
