# Molly Sohaney

*Security Analyst | Software Developer*

*US Citizen*

molly.sohaney@gmail.com | Atlanta, GA | linkedin.com/in/mollysohaney | mollysohaney.github.io

## PROFESSIONAL OVERVIEW

Security+ certified cybersecurity professional with a B.S. in Computer Science and hands-on experience in detection engineering, digital forensics, and incident investigation, plus software development experience across Java, Python, and Android. Built and deployed a commercial AI mobile app and competes in CTFs. Passionate about protecting systems, identifying threats, and building scalable, user-focused software.

## EDUCATION

Bachelor of Science in Computer Science | University of Georgia DEC 2025

- Minor: Cognitive Science | Certificates: Cybersecurity & Privacy, Data Science
- Relevant Coursework: Algorithms, Data Structures, Networks, Operating Systems, Database Management, Cybersecurity, Computer Forensics, Cryptology, Data Security & Privacy

## SKILLS

**Security:** SIEM, Detection Engineering, Threat Hunting, Incident Response, Digital Forensics, Security Monitoring, Cryptography, NIST CSF, MITRE ATT&CK, IAM Fundamentals
**Tools:** Elastic Security, Kibana, Fleet, Wireshark, Autopsy, Sleuth Kit, Volatility, Chronicle, Grafana, Jira, Docker, Git
**Programming:** Python, Java, SQL (MySQL), C, JavaScript, Kotlin, Assembly
**Frameworks:** Spring Boot, Selenium, TestNG, JUnit, LangChain
**Cloud & Platforms:** AWS (IAM, EC2, S3), Linux, Windows, macOS
**Networking:** TCP/IP, DNS, SSH, HTTP/S, ICMP, Packet Analysis, Firewalls

## WORK EXPERIENCE

**SOFTWARE DEVELOPER** | BeyondFech MAY 2022 – AUG 2023

- Developed a Java automation app (Selenium WebDriver, TestNG) to automate appraiser research across websites
- Reduced manual regression testing effort by approximately 70% with an automated testing workflow
- Built OCR-based data extraction templates using Tesseract OCR
- Wrote and optimized SQL queries for application data validation and retrieval

**SECURITY AWARENESS ANALYST (VIRTUAL EXPERIENCE)** | Mastercard via Forage JAN 2025

- Helped identify and report threats such as phishing; analyzed which teams needed stronger security training
- Implemented training courses and procedures for those teams

## PROJECTS

**Elastic SIEM Detection Engineering Lab**

- Built an Elastic Security lab using Elasticsearch, Kibana, Fleet, and Elastic Agents
- Simulated brute-force attacks, persistence techniques, and privilege escalation scenarios
- Developed custom EQL/KQL detections to identify and investigate security events using real telemetry

**USB Forensics Investigation**

- Analyzed USB artifacts with Autopsy/Sleuth Kit, recovering connection timestamps, device IDs, and file transfer logs
- Reconstructed a user activity timeline, correlated findings to MITRE ATT&CK, and wrote a professional report

**TrackMacros (AI Nutrition Tracking App, iOS & Android)**

- Built, deployed, and maintain the Android app end-to-end; app has 130+ users through public app store releases
- Contributed backend work for Android compatibility, including configuring OAuth credentials and service accounts

**Java / Spring Boot Applications** (Banking Web App, Microblogging Platform, Chess Engine)

- Built team apps with Spring Boot, MySQL, and Docker; developed a chess engine with rule and move validation

## CTF & COMPETITIONS

- Placed 20/801 in CSS CTF 2026: Return of Nexus; published CTF writeups at mollysohaney.hashnode.dev
- UGAHacks X (FEB 2025): built a security-aware web app with session-based authentication and database integration

## CERTIFICATIONS

CompTIA Security+ NOV 2025

Google Cybersecurity Professional Certificate NOV 2024
